

Soham Deb Majumder

REACT DEVELOPER

PERSONAL PROJECTS

SPECIDEX

Specidex is a website capable of multiple animal species identification, using Neural Networks and Deep Learning.

Moonquake

An interactive web app which plots an animated seismic wave on a 3D model of the Moon based on the user's input.

Mazegame

This is small game I built with an online 2D physics engine and made it functioning using JS. Fun Game to play and to kill time to reach the finish point.

Student Management System

A basic system build using react and designed using material UI with basic API's call and CRUD operations

Movie Fight

Movie Fight is a website where you select movies and compare between them. Using an API I got the movie information and compared the result to show which is the best
