Lawyers for President Biden's son Hunter Biden argue in a new court filing that part of their failed plea deal with federal prosecutors should still stand, because a judge's approval was never needed to handle a gun possession charge through a diversion program.

Unlike all of Trump's "as seen on TV" legal staff, the Bidens actually have quality attorneys working for them. And because it's the Republicans who are instigating all of this, it shouldn't be too hard to figure out actual legal solutions and limitations to what's happening.

Laurie Blate-Baker he's being covered by daddy, because daddy doesn't want to get his name involved which it already is, both hunter and joe should be in jail, the only reason they aren't is because they weaponized the DOJ in their favor, but don't be naive.

Meanwhile, Jared Kushner got over \$3 billion --mainly from the Saudis and other Middle Eastern countries--for a hedge fund that pays him approx. \$40 million a year to manage it. Kushner has NO experience as a hedge fund manager. The Saudi's own financial advisors begged the kingdom NOT to give him that astonishing amount of money. But he got it anyway. He's a real deal breaker.

Imagine the following headline:

"fires in the state of Hawaii have been burning for a week, destroyed entire towns, and killed 100 people... all the while President Trump vacations on a beach"

Now replace 'Trump' with 'Biden' - and that's today's reality. Total hypocrisy.

Can we take a look at #JaredKushner Saudi money as well? Or are we saving it for later "show and tell"?

I'm praying Hunter gets out of this. We have to protect Joe from his bribes and corruption or Trump will be back.

Just send him to Federal Correctional Institution, Cumberland now. Pop can come over to see him when he is at Camp David.

Just love the way the Compost deletes responses to posts.

The comments tell a lot about what is happening, so I need the text with the comments together to validate the publication and consider it in the sum total.

2 - I need an interface where I can search using keywords as I explained. I need to know if I'm going to collect from the first moment and the way you're going to save it at the base of the system.

3 - Must capture on pages and public profiles like the link in the URL I see when I'm logged in

<https://www.facebook.com/search/posts?q=joe%20biden%20president>

4 - The result of the publications must be made available in JSON or CSV format, showing the text, and the published link.
